

EDITORIAL

A YEAR FULL OF REALIZATIONS...

Regina Célia Gollner Zeitoun

Finally, we arrived to the end of another year of our Journal, a year full of realizations. We experimented a new graphic project of the Journal, which works, since the plenty compliments, confirming its acceptance. The Vancouver style, already accepted by the community, also was implanted. And as everything in life, it is a question of habit and custom. The Editorial Committee was created, wich contributed for the quality and efficient of the Journal, in to make possible a periodic of quality to the readers. The Journal had approved the concession of financing by the CNPq, that was without a doubt essential to warrant the enclosed of 2004 with the periodicity assured. Therefore our thankfulness to the CNPq must be recorded detaching the importance of the Editorial Committee composed by the PHd Professors Isaura Setenta Porto (Chief Editor), Ana Beatriz Queiroz, Marluci Conceição Stipp and Rosane Harter Griep (Associated Editors) and of the Master Professor Lilian Felipe Duarte de Oliveira (Assistant Editor). We would like to thank the whole staff. These facts were very important in this year that is ending.

And now lets talk about wich every reader hoping to find in the Journal's Editorial. What we have published in this number? We have reflection, research and experience report articles. In wich one it must be find a production of knowledge about specifics thematics, as well as related to these articles, the utilization of theorical and methodologic-theorical references that is use in the researchs in the nursing field showing themselves as adequated and necessaries to take care of our inquietude presented in the objects of study. Thus, inicialy in the reflection articles there is the Fenomenology, the Help Relation and the meannings of the Sensitive Care as possibilities of research and of conceptions in the practice of nursing. In the ones that are about the research results, there are the ones related to the Historical Research (The atualization of the military habitus of the army nurses; The apprenticeship of the Anna Nery School in the São Sebastião isolation hospital); the questions related to the women (knowlegde about syphilis, the sexuality after the mastectomy) and gender (the reproductive health); to the nursing worker health and the globalization; the psychiatric patient (aggressive manifestation to the internment and the perception of the sexual life) and the alcoholic patient. To concluded the articles with research results, we yet have the ones that referring to nursing in the Family Health Program and the Hansen's disease; and the profile of the egress person from a Postgraduation Program. In the experience report was approached the questions related to the alternative communication in the nursing care to clients with laryngectomy and the presentation of a technological artifact produced from the approximation of the nursing care.

So, dear readers, we also have arrived to the end of this Editorial. We hope that you have a pleasant and an advantageous reading of the articles that could be used as reference for yours studies, researchs and, whenever is possible, for your practice of nursing showing the social impact of the researchs of this Journal. Make possible the Journal publicizing, prepare yours manuscripts and send them to us. Will be with great pleasure that we will included them in the Anna Nery Journal of Nursing. A Happy 2005 for everyone!
